## Work Experience

### Full Stack Developer at Telmie

Oct, 2021 - Present

Telmie is an online marketplace for professional services in real-time, makes it easy for anyone to find and talk to an expert who can help them to achieve their goal.

- As a fullstack developer, I started with website design and developed a website with MERN stack.
- Worked in a Test-Driven-Development and Agile environment like Scrum and Kanban Methodologies.
- Here we use the JS framework React JS and build a flexible and modern frontend with powerful ideas.
- Built Testing cases using Jest and cypress and covered coverage by 90%.
- Developed backend and database model and schema with Node.js, MongoDB and MySQL
- Wrote GraphQL queries on existing database and integrated GraphQL APIs to the frontend.
- Deployed serverless applications using AWS lambda and worked with AWS S3 and DynamoDB.

### Senior Frontend Engineer at Lighthouse

Nov, 2019 - Sep, 2021

Lighthouse is a timber-framed modular manufacturer and offer both bespoke and standardised homes, build houses, apartments and bungalows (and occasionally bird observatories).

- Implemented User Friendly Interface by using React 16 / TS & Styled components and built frontend side of several applications and React and also built educational platform using React / TS / MUI
- Implemented Redux data structure and making APIs calls with Redux-Thunk.
- Mainly developed JS/TS based projects using React and Vue for the frontend side.
- I also worked with backend engineers to enhance security and manage on-site assessments, internal audits and customer surveys.
- Slack and Jira for team communication and management.

### Frotend Developer at Skillr

May, 2017 - Oct, 2019

Skillr's making the world's knowledge and entertainment more accessible than ever, enable anyone to video chat one-on-one live with an expert instantly and seamlessly.

- Implemented frontend solutions for web applications using modern JS frameworks (React, Next.js).
- Collaborated with the team to design new features and enhancements of existing system.
- Created reusable components that can be used across multiple projects as well as optimized code for performance in large scale applications.
- Participated in architectural review meetings regarding application development practices and participated in technical discussions about implementation details of various features or fixes.

## Education

2013 - 2017

**Bachelor's degree of Computer and Information Engineering** from University of Southern California
